PO Box 238
WILLETTON WA 6955

Specimen

Product Name: _____

Part Number: _____

Batch / GRN No _____

Treatment: _____

Adhesive: _____

Application: _____

(Floor Covering, Seat Cover, interior panel etc)

PLEASE NOTE:

Every set of burn test samples requires either a GRN (Goods Received Number), a batch number or another form of internal traceability. GRNs are required for each material component in the case of a composite sample. Please ensure this information is provided with each set of burn test samples to eliminate any unnecessary delays.

For each test, three (3) samples of 3" x 12" need to be supplied. However if the material is woven, 3 samples in each of the warp and weft directions need to be supplied (6 samples total)

The samples should be as thick as the material to be installed in the aircraft up to a maximum of .5".
