

Rear Cargo Barrier

Cessna 206/210

Introduction

The **Aeronautical Engineers Australia** Cessna 206/210 Rear Cargo Barrier is applicable for use on all Cessna 206 series and 6 Seat 210 series aircraft (210K and on). The barrier secures freight or baggage in the rear baggage bay, which still allows easy access if required in flight.

The barrier attaches to the existing hardpoints in the aircraft and is Australian PMA approved.

NEW! Under the new May 2010 Bilateral Aviation Safety Agreement between the USA and Australia, this product is now accepted by the FAA for installation on N-registered aircraft.

Features

- Cargo Capacity of 54kg (120 lbs)
- Quick installation and removal by pilots.
- Manufactured from ultra hard wearing materials for long service life.
- Infill between the webbing to restrain small articles.
- Meets latest flammability requirements.
- Installation and maintenance instructions included on net, no other paperwork required.

Installation View

Experience

Aeronautical Engineers Australia has over 30 years of experience in the design and manufacture of aircraft systems and has installed these systems on a wide range of aircraft with numerous examples in service around Australia.
