

Cargo Throwover Net

Cessna 206

Introduction

The **Aeronautical Engineers Australia** Cessna 206/210 Cargo Throwover net is applicable for use on all Cessna 206 series and 6 Seat 210 series aircraft (210K and on). The throwover net allows the quick conversion of the aircraft to a 2 seat freighter, while ensuring that the load is safely secured behind the pilot's seats.

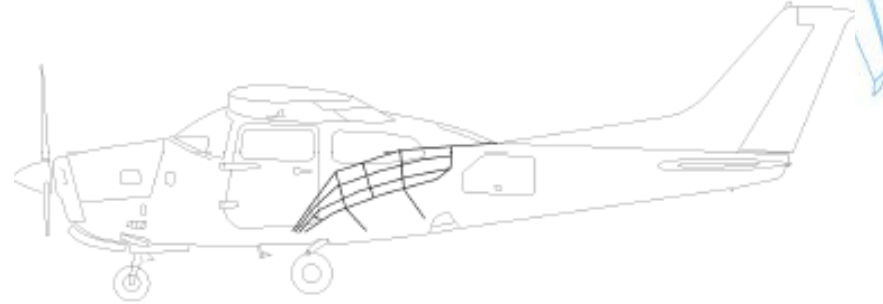

The barrier attaches to the existing hardpoints in the aircraft and seat tracks and is Australian PMA approved. This net requires 4 seat track clamps, which can be supplied upon request.

NEW! Under the new May 2010 Bilateral Aviation Safety Agreement between the USA and Australia, this product is now accepted by the FAA for installation on N-registered aircraft.

Features

- Cargo Capacity of 325kg (716 lbs)
- Quick installation and removal by pilots.
- Manufactured from ultra hard wearing materials for long service life.
- Infill between the webbing to restrain small articles.
- Meets latest flammability requirements.
- Side straps can be used independently to restrain large or heavy items.
- Installation and maintenance instructions included on net, no other paperwork required.

Installation View

Experience

Aeronautical Engineers Australia has over 30 years of experience in the design and manufacture of aircraft systems and has installed these systems on a wide range of aircraft with numerous examples in service around Australia.
