

Cargo Throwover Net

Fairchild/Swearingen SA227 Series

Introduction

The **Aeronautical Engineers Australia** SA227 series cargo throwover net is applicable for installation on most Metroliner series aircraft. The net allows the aircraft to be used for freight operations, securing cargo in the passenger compartment.

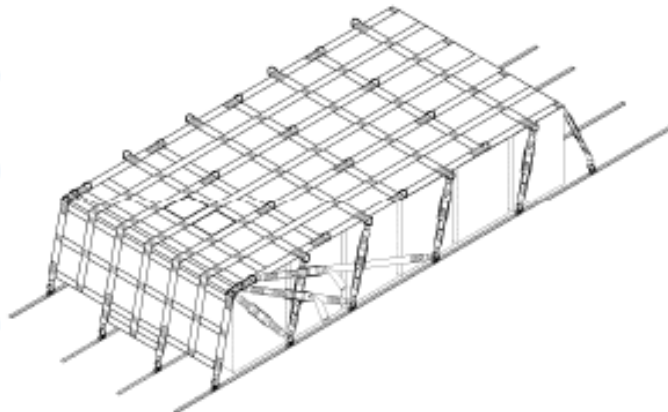

The throwover net covers the cargo load to prevent articles moving during flight.

Aeronautical Engineers Australia can supply an installation kit including the net, attaching straps, seat track fittings and CAR35 approved Engineering Order for installation. Local NAA approval will be required for aircraft registered outside Australia.

Features

- Rated for up to 900kg (1985 lbs) of cargo per net.
- Manufactured from durable mil-spec webbing and nylon infill.
- Modular construction allow net to be folded under for smaller loads
- Includes 18 straps which can be used stand-alone to restraint individual cargo.
- Quickly installed and removed by flight crew

Installation View

Experience

Aeronautical Engineers Australia has over 30 years of experience in the design and manufacture of aircraft systems and has installed these systems on a wide range of aircraft with numerous examples in service around Australia.
